Preface

Epoka University is proud to confirm that the obligations and promises presented in Epoka's last strategy, 2013-2017 "On creating public value", were implemented successfully. 2017 has been a milestone year for the future of our University. Epoka has achieved the institutional re-accreditation, the re-accreditation of over 15 academic programs, it has increased the number of study programs and opened a new faculty. In 2017 the University presented new goals and aspirations for its future.

The new goals in this Framework Strategy 2018-2022 build upon a decade of tradition. They ambitiously reflect the recent national development strategies, the increasing public demand for higher education and the interests of our stakeholders, the owners, students, alumni, staff and the faculty alike. These goals are also coherent with the most recent regional and global education and economic policies. The existing departmental and other units' strategies developed in 2016-2017 and valid for the period of 2017-2022 constitute the backbone of Epoka's new 2018-2022 Strategy. This strategy envisages a greater role of Epoka in local, national and regional development, and a greater engagement with the community.

We would like to thank every contributor of this ambitious future plan for cooperating with the Strategy Steering Committee.

Members of the Strategy Steering Committee

Rector , Prof. Dr. G�ng�r TURAN;
Dean of Faculty of Economics and Administrative Sciences , Assoc. Prof. Dr. Salih �ZCAN;
Dean of Faculty of Law and Social Sciences , Assoc. Prof. Dr. Lisen BASHKURTI;
Dean of Faculty of Architecture and Engineering , Assoc. Prof. Dr. Sokol DERVISHI;
University Administrator , Mr. Sezer ERDO�AN;
Dean of Students , Mr. Roland HOXHA;
Vice - Dean of Students , Ms. Semra Bilgi� YERLIKAYA;
Chairperson of the PC on Quality Assurance , Prof. Dr. Teoman DUMAN;
Head of Institutional and Legal Affairs Office , Dr. Niuton MULLETI.

Timeline on the drafting and finalization of the 2018-2022 Strategic Plan

Announcement/Printing of St Plan 2018-2022	In December 2018	Rector's Office

1. Introduction

Epoka University (Epoka) started its academic activities during the 2007-2008 academic year based on the Decision of the Council of Ministers of the Republic of Albania No. 281/2008.

Epoka University comprises three faculties: the Faculty of Architecture and Engineering, comprising the Departments of Architecture, Civil Engineering and Computer Engineering, the Faculty of Economics and Administrative Sciences composed of the Departments of Banking and Finance, Business Administration and Economics, and the Faculty of Law and Social Sciences comprising the Department of Law, the Department of Political Science and International Relations as well as the Center for European Studies. Epoka University offers education in three study cycles with 10 Bachelor, 8 Master of Science, 9 Professional Master, 2 integrated second cycle and 6 PhD study programs. All study programs have been granted national accreditation.

Epoka offers in total 35 study programs: 10 in the first cycle (Bachelor); 19 in the second cycle (8 Master of Science programs, 9 Professional Master programs and 2 integrated second cycle program); and 6 programs in the third cycle (PhD). Epoka is focused on economics and finance (14 study programs), information and telecommunication technology (7), architecture (4), civil engineering (4), law (1) and political science (5). The programs are currently provided by the Faculty of Architecture and Engineering, Faculty of Economics and Administrative Sciences and Faculty of Law and Social Sciences. The University employs 102 academic staff members. As of December 31, 2017, the total number of students in all study programs was 1880, of which undergraduates constitute 80 percent of the student body.

Epoka has an increasing number of partners in EU member states, the USA, and Western Balkan countries. In 2017, Epoka had 66 university partnerships around the world and it has been a hosting university for several student and staff mobility programs, including the Erasmus+ Programme and Mevlana. Epoka University is also an associate member of the European Universities Association (EUA) as well as a member of the International Association of Universities (IAU), and at the same time, it is a signatory of Magna Charta Universitatum.

Epoka actively supports the research of its faculty through the granting of financial support regarding participation in international conferences as well as publication of articles in international peer-reviewed journals with impact factor. The university has also been part of many international and national research projects, especially under the European Research Area. This year Epoka is involved in three Erasmus+ CBHE projects, six COST actions and it is also a partner in a consortium of a Horizon 2020 project.

Epoka University has a large smart campus, situated in a green area outside the city of Tirana including venues with state-of-the-art physical and IT infrastructure. The facilities provide high-quality services to students, staff and other stakeholders.

Epoka was granted its first institutional accreditation in 2011. In 2011 and between 2012 to 2017 the Ministry of Education and Sports accredited all Bachelor programs, Master of Science (MSc) and Professional Master (PM) programs offered by Epoka University. In the 2015-2016 academic year Epoka received accreditation for all its third cycle programs (PhD). In 2017 the University was granted its second institutional accreditation.

2. Principles

Epoka's strategy 2018-2022 builds upon the success of its previous strategy (2013-2017). The new strategy sets out new goals and a new roadmap for the future development of the university.

The Framework Strategy describes the goals and provides a roadmap for the development of Epoka University in the three main missions of the university: teaching, research and service to the community. Hence, this Framework Strategy constitutes an overarching structure for the more flexible strategies of the departments and other units of Epoka University.

The strategic goals are based on the mission, the vision and the core values of the university.

The Mission from the Statute of the Epoka University is:

"To be an innovative and influential teaching and research institution, serving to fundamental human values through the production, dissemination and development of knowledge at an international level as well as to contribute to the improvement of the life quality of society based on national and regional needs. In this context, Epoka University aims at raising well-prepared, productive and competent individuals with a research-oriented spirit, who possess professional ethics and social sensitiveness and are also open towards national and international challenges."

The Vision from the Statute of Epoka University is:

"To be a leading university in our country in the areas of education, research and development, as well as service to society."

The Core Values of Epoka University according to its Statute are:

Epoka University:

- Believes in the universality of education and research;
- Obeys to universal legal principles and rules;
- Is respectful and tolerant towards different religions, languages, genders, nationalities, colors, and differences in opinion;
- Shows no compromise regarding the preservation of justice and integrity;
- Keeps institutional identity in the forefront;
- Adopts a participatory, transparent, decision-oriented, sensitive, rapid and effective governance;
- Continuously interacts with the community to become a pioneer and a model of learning and research at the local and international level;
- Is a student-focused institution in all procedures;
- Gives importance to the harmony, liaison and satisfaction of its personnel;
- Is open to innovation;
- Pursuits excellence;
- Values time;
- Creates a safe and sustainable environment in the premises;
- Puts emphasis on the conduct original research.

2.1 Implementation of Epoka's Strategic Plan 2013-2017 Strategy

Epoka has declared a specific mission in its Strategic Plan 2013-2017, aiming to provide education, research and contribution to the society, while reflecting both national priorities and international standards. Epoka University's Strategic Plan 2013-2017 was prepared in 2013 as a leading roadmap for the University's teaching, research, and administrative activities. The plan identified important building blocks for the university and presented important targets with the aim to improve developing institutional relations, institutional infrastructure and to sustain its development. The objectives were grouped in four categories: Scientific, Educational, Institutional Relations, and Institutional Development. All objectives were accompanied by performance indicators to measure their accomplishment. The quality assurance unit of the University - the Academic Evaluation and Quality Improvement (AEQI) Board (re-organised in 2017 into the Permanent Commission on Quality Assurance) - conducted an internal interim evaluation of the Strategic Plan of Epoka University (2013-2017) during the period of April-July 2017 as well as a final evaluation in 2018.

The evaluation assessed that the majority of the activities and indicators envisioned by the Strategic Plan 2013-2017 were fulfilled and the remaining activities were likely to be implemented by the end of the timeline of the current Strategic Plan. It has been revealed that, although in some places it was difficult to measure indicators envisioned by the Strategy Plan, the evaluation group concluded that the goals and outcomes have been realistically planned and they have provided practical

guidance for the work of the university. The expected outputs have been honored particularly in all its objectives, including Scientific, Educational, Institutional Relations, and Institutional Development.

The evaluation team confirmed that the scientific objectives and outcomes as set out in the Strategic Plan have been met and even surpassed some of the team's expectations. The number of international research activities, projects and publications has increased every year. By 2016 the University has participated in more than 100 national and international research projects. Research capacities at Epoka University have steadily increased both in terms of human and financial resources. In 2016, the number of academic staff participating in research activities and projects grew beyond levels envisaged at the Strategic Plan 2013-2017. Research and project participation have been mutually coherent and reinforcing each other. The evaluation team evidenced joint work among staff members to enhance research and project planning and participation. However, more systematic University-directed coordination between these activities may have produced better results. Also, better definition of the performance indicators may have helped for better review and assessment of the results. This recommendation was then implemented in the departments' strategies.

In the area of education, the objectives were achieved through collaboration and exchange programs with other universities in Europe, some of which included training activities and change of syllabi. The University signed up to

the Erasmus+ Programme of the European Union that enabled the University to be part of the European exchange and mobility program for its students and staff members. The university has been able to mainstream the practice of mobility in education throughout its departments. Among other key achievements include building the community of master and PhD students that in turn should enhance the teaching infrastructure. However, it is yet to develop an environment that is conducive to the specific needs of its master and PhD students. Course syllabi and materials are constantly updated however the University staff members need further awareness on enhancing the content of the syllabi in order to provide for certainty and clarity to expectations by the students and also to enhance research, multi-disciplinary and internationalization aspects of the courses. Epoka University possesses a highly qualified full time academic staff, 36 % of whom are foreign. During the 2016-2017 academic year, the student/lecturer ratio has been 14, pointing to the particular emphasis placed by Epoka University on high-quality teaching and the student-oriented approach of its activities. Around 5% of the students come from foreign countries, mainly from the region.

In the area of institutional relations, Epoka University developed internal rules and legislation in line with the Albanian national legislation and European standards. It provided encouragement to its staff members for cooperation with other universities nationally and internationally, businesses, civil society organizations, experts, researchers and professors. The University showed leadership in responding to the emerging developments in the context of the functioning of the universities. Its visibility is high among the key stakeholders nationally in Albania and internationally, specifically in the EU and Western Balkan countries. The activities implemented helped the University to

consolidate its human resources, to sign partnership agreements with universities and civil society organizations, to build infrastructure for its institutional relations with other stakeholders, including in the field of institutional evaluation and accreditation. The University has managed to establish cooperative relationships with the relevant stakeholders in order to work together on key areas. “Internationalization” represents a strategic objective of Epoka University. In this context, Epoka University is one of the very few universities in Albania to conduct student and staff exchange programs with foreign universities. Furthermore, Epoka University cooperates with numerous EU universities through the Erasmus + Programme; in the perspective of Research and Projects aiming to support actions in the field of Education, Training and Youth and Sport, and also in terms of staff and student exchange. Epoka University is the first of the very few private higher education institutions in Albania to have benefited from the TEMPUS program (replaced later by Erasmus +), financed by the European Union.

Epoka University has also been active in increasing social awareness both inside and outside the university. It has provided institutional support to various social actors in Albania. It has also invested in improving material and social infrastructure within the University. Some of these investments are likely to be sustained for considerable future. Epoka University stands as credible institution in the eyes of local stakeholders in bringing them together for joint social actions and projects.

2.2 Challenges of the present and future

The higher education system has been reformed by the government and higher education institutions have been reorganized and adapted according to the new system in Albania. During 2008-2013, when the system expanded, Epoka University grew rapidly and became a leading university in the country. While further opportunities are waiting to be grasped by higher education institutions, there are also somerisksaffecting the future ofprivate higher education institutions in the market. Epoka University has been reorganized and has adapted its system according to this newly reformed system, and it is now ready to accomplish its strategic goals under the reformed higher education system of Albania. The decline in student numbers in Albanian universities¹, arising from population decline and emigration, is set to further increase the competition among Albanian private higher education institutions. However, Epoka University has already created its reputation in attracting and graduating highly qualified students in the fields of engineering and social sciences. Furthermore, the University will continue to target the regional and international higher education markets by attracting foreign students from the Western Balkans, including Albanian migrants from Greece, Italy and other countries, and other Eastern European countries. Those markets are to be targeted especially for the Master and PhD programs.

Epoka University is aware of the industrial priorities of Albania in the service and industrial

sector and it will continue to provide education and training in the fields of engineering, business, tourism and social enterprises. Epoka will actively contribute to the development of the communities surrounding the Epoka University campus, including Vora, Kamza, the International Airport area and Tirana, which are evolving into industrial hubs for the whole Western Balkan region. Epoka's engagement with the local industries will also continue to be of benefit to students for internship and future employment possibilities.

Epoka will continue to cooperate with its partners in applying for EU-funded research projects. The university will also increase its financial commitment to the faculty involved in interdisciplinary scientific research. Epoka will put a greater emphasis on scientific projects that are to the benefit of the Albanian community and the region, particularlyregarding the development of tourism in the coastal areas as well as in inner cities and towns around Albania. Projects of regional outreach will be further supported by Epoka with the aim to increase university's reputation in the region.

Epoka University recognizes the challenges associated with its aspiration to achieve excellence in research, in teaching, in student performance and in management. The University will now seek international accreditation of its business and engineering programs. Epoka University is also committed to fulfill all the required improvements from the institutional review carried out by the national accreditation body.

¹ INSTAT (2018) Since 2013 there has been on average an annual decline of 8000 students in higher education, and roughly the same annual decline (7000) in high school students.

2.3 Vision

The vision of the university sets out the direction for the future development of Epoka University in terms of its obligation towards the society. Epoka's societal obligations are the production, transfer and the application of knowledge. Knowledge provides the solutions to our societal problems in Albania and enables us to face the regional challenges.

The Vision of Epoka University is: *"To be a leading university in Albania in the areas of education, research and development, as well as service to the society."*

Epoka University will continue to emphasize its contributing role to the community, as in its previous strategy (2013-2017) under the motto: "On creating public value". Now the vision is to

stress the relationship between knowledge, innovation and the service to the community. Thus, Epoka University will teach its students the required skills and conduct research by emphasizing the role of knowledge in providing solutions to everyday problems of our community. Epoka University will devote resources and strategies to providing further training and services in Albania, focusing on the sectors of information technology, tourism, construction and other priority areas for the development of the Albanian economy. Hence, Epoka University will continue to be one of the greatest contributors of the region in terms of resources, innovative solutions, knowledge transfer and employment.

3. Institutional and Faculty Priorities

The vision and goals of Epoka University's Strategy 2018-2022 are part of the three main themes of the strategies at the departmental and unit level, mentioned below. The Rectorate is committed to present these strategy goals and visions as valid for the whole university. They are enshrined accordingly in the Framework Strategy 2018-2022. Faculties and departments will have to adapt the Framework Strategy to their own strategic priorities and themes, contribute to the formulation of goals and measures for their implementation, and work and develop the appropriate tools and skills necessary for the implementation of these priority themes at the unit level. The Rectorate, together with the Permanent Commission on Quality Assurance, will coordinate the

Framework Strategy 2018-2022 and departmental strategies and oversee the implementation.

In line with the provisions of its Statute and in order to further consolidate its institutional profile, Epoka University aims to achieve in 2019 full legal personality separate from that of the Founding Company. The change in the legal status of Epoka University will further contribute to the achievement of the goals and objectives stipulated in this Strategy.

The strategies at the departmental and unit level, developed in 2016-2017, are set according to these themes and priorities:

1- Provide a high-quality environment for teaching and learning.

Epoka University is a research-based teaching, and particularly with PhD study programs, a research-oriented university. Offering undergraduate degrees and issuing professional degrees while introducing state-of-the-art teaching technologies is Epoka's strength and it will remain a priority of the university in the coming five years.

Epoka is committed to provide and improve its teaching and learning environment. The University will continue to use innovative teaching methodologies to enhance the positive learning experience of its students. The University values the research of its academic staff on teaching, and it will increase its efforts to develop creative ways of teaching. Training activities in the area of teaching and learning will continue to be provided, but they will have to be tailored to the needs of each department. Epoka University will provide the resources and facilities for such activities.

The focus of the curriculum and teaching will remain on the student, their support and development. The curriculum will continue to provide mainly practical training and personal instructions to students seeking to develop technical skills in combination with academic study and professional development.

Epoka remains committed to the goals of the national Cross-Cutting Employment Strategy 2014-2020 concerning the links with the labor market. The University will continue with its promotion of entrepreneurial learning and assisting students to transit to the world of work. Students will continue to have access to highly trained instructors, who often are or have been practicing professionals.

Epoka's commitments in the area of citizenship education are in accordance with the national social policies and UNESCO's Sustainable

Development Goal (Target 4.7). Students at Epoka will acquire the relevant knowledge and technical skills needed for sustainable development and sustainable lifestyles. The promotion of human rights, gender equality, the values of peace and non-violence, global citizenship, social inclusion and appreciation of cultural diversity will be integrated in the curriculum.

The internal and external quality assurance processes will serve to improve the learning environment, whereby the Permanent Commission on Quality Assurance and the responsible units at the departmental level will play a greater role. All study programs will undergo an annual review and be updated with the most recent developments in the labor market. The competence and training centers at the university will have to be revived and supply high quality lifelong learning courses for both in-house and outside students.

The university will continue to attract high-quality and diverse academic staff with international reputation. The number of faculty will increase according to the needs of departments. Epoka University will capitalize upon the mobility of staff, international research projects and other activities with national, regional or global outreach, in order to increase its status as an international teaching university.

Individual or collaborative research will be integrated into teaching and include students from all levels of education, especially graduate students at the master and PhD level. A greater emphasis should be given to the community-related research projects at the graduate level.

Epoka University will continue with its commitment to the community, but a greater emphasis will be given to service learning. In order to promote the civic growth of students, Epoka will require the departments to integrate

community service into their coursework. This requires a purposeful use of learning activities that focus on the knowledge, skills and dispositions of a civic-minded university graduate. Students will thereby be able to play an active role in empowering others and enhancing the quality of life in their community. Students will be required to engage in learning activities that involve classroom instructions on civics, moderated discussions of current events, student governance, community activities and simulations. Students will be required to actively search for internships and similar involvements in their first year.

Investments in the teaching and learning infrastructure will continue with the same intensity. Computer and laboratory facilities must be kept up to date and be used efficiently and productively. Epoka University will ensure that instructional technologies are modern, versatile and fit for active learning. In alignment with the national Cross-Cutting Strategy on Information Society, the University will expand its digital provision in e-education and research.

2- Enroll, educate, graduate and provide placement assistance for a high-quality and diverse student body.

Since 2008 Epoka University has steadily increased enrollments and the university will continue its growth course. The university will maintain its reputation as one of the best engineering, business and social science universities in Albania, both in undergraduate and graduate programs. Retention, graduation and employment rates of students will increase above those at the national level.

Epoka University will implement new scholarship programs to increase the diversity of the students' background and status. The scholarship programs will be both need- and merit-based.

Epoka University is committed to provide students with high quality services in catering, transportation, accommodation and other facilities. The units responsible for the student affairs will prepare their own strategies and goals on how to improve their services and responsiveness towards students' needs. Epoka remains devoted to the extracurricular involvements of students within the university and outside, for the community at large.

While the staff of Epoka University will continue to provide assistance to students with special needs, the University will make available additional services to ensure the well-being of these students.

3- Provide a high-quality environment for research and project development.

Epoka University will continue with its commitment to research. The financial resources at the disposal of the faculty will increase. However, these commitments will require a greater involvement of the staff in research project applications in national and international calls. Collaborative research or services provided to and with government entities or international donors will continue to be positively evaluated in the process of staff evaluation.

Resources must be distributed more efficiently at the departmental level. Departments must develop their own research strategies according to their strengths in terms of their human resources. Research strategies must be concentrated on two or three particular areas of research. Epoka University will finance activities that are related to the needs of the community and promise to improve the life of the people affected by the project.

4. Goals and objectives

The three main strategic priorities mentioned above also constitute the strategic goals of Epoka University. The strategic goals should establish the basis for the departmental strategies. Each faculty, department and other

academic or administrative unit will make its own contribution to successfully implement the strategic goals of Epoka University. The goals comprise the pillars of Epoka's mission: teaching, research and services.

4.1 Goals and Objectives of the Faculties

1- Teaching goals:

- Epoka University will increase its commitment to improving its teaching content and methodology, by increasing its offer in study programs and implementing new teaching methodologies.
- Epoka University will increase its reputation in supplying practice-relevant knowledge in its undergraduate and graduate programs.
- The Bachelor and Professional Master study programs will be tailored to the needs of the labor market at the national, regional and European level.
- Epoka University will further improve the quality of its programs and attract the best students from Albanian high schools. The university will also invest in its reputation abroad in order to increase the number of students from Western Balkans' countries.
- The curriculum will emphasize the role of creativity and innovation, by promoting critical thinking skills and entrepreneurship. The curriculum will be aligned with the UNESCO's goals of citizenship education and sustainable

development; and in alignment with the goals of the national cross-cutting strategies on Information Society.

- Faculty will be encouraged to develop innovative and creative approaches to teaching.
- Departments should increase their efforts in the area of internationalization by encouraging cooperation and strategic partnerships with Western universities, the public sector and business organizations.
- Academic programs in the field of business and engineering will meet the quality assurance standards of international accreditation bodies.

2 – Research and project development goals:

- Epoka University will provide opportunities to engage its staff in a wide range of research activities and other relevant project development areas. Among others, such opportunities involve financial and infrastructural support and they should be used efficiently and productively. Research activities must be oriented towards the needs of a variety of stakeholders, especially the local

economy and the Albanian public administration.

- Research activities will involve national and international research organizations and have a strong interdisciplinary element. Project development should comprise both national and European areas of interest and cooperation partners.
- Research and project development activities will be focused in those areas that efficiently utilize the human capacities of the university and are integrated with the research strategies at the departmental level.
- Departments will continue to facilitate the international mobility of researchers, participation in European-wide projects and other international programs.
- Graduate programs (Master of Science and PhD) will be tailored according to the priorities of the human resource strategy for research in Albania, the Western Balkans, and European Research Area (ERA).

3 – Community Service goals:

- Epoka University will offer services in those areas that the university has demonstrated expert knowledge, such as in the field of engineering, design, business, finance and social sciences.
- Service provision should be tied to the provision of research and teaching, especially at the graduate level.
- The University will encourage faculties and students to create business incubators. A good example that should be replicated is the YUNUS social enterprise.
- Services should cover their own costs and not create additional costs for the university.
- Opportunities of collaboration with external partners, such as the public sector, voluntary organizations, non-governmental bodies and business organizations should be sought.

4.2 Goals and Objectives for the Research Centers

Epoka has established three multi-disciplinary research centers: the Epoka University Center for European Studies (CES), whose main scope is the improvement of the understanding of global issues and interdisciplinary studies, the Center of Research and Design in Applied Sciences (CoRDA), whose aim is to promote excellence in research and bridge-building with the construction industry, and the Yunus Center for Social Business and Sustainability (YCSBS). The centers will be assisted and supported by the Research and Project Office (RPO).

CES was founded on Epoka University's regionally-renowned teaching reputation and research excellence. The Center seeks to encourage programs across disciplines that increase an understanding of the diversity of the societies and cultures that constitute Europe. In the focus of its research is to examine the traditional divisions within and across Europe (North/South, West/East) and how those divisions influence the present membership in the European Union and its future expansion; while dealing with the issues

of exclusion and inclusion, and global positioning in the European “space.”

CoRDA intends to implement design strategies based on interdisciplinary principles, generating integrative design between the user and the designer; and develop projects in different fields of Applied Sciences. The center provides consulting services in different fields, such as Urban and Building Physics, Universal Design, Structural Engineering, Construction Materials, Construction Management, Water Resources, and Environmental Engineering, etc. Functioning as a research entity, the center aims to offer to the academy a platform for developing research projects and publishing the results of the related subjects in scientific research. One of the main objectives of CoRDA is to facilitate the engagement of students and graduates in the professional practice.

YCSBS serves as a research center to map the social business ecosystem, gather knowledge on social business, examine and test theories of social business, while also seeking to find predictors of success in social business and its ultimate impact in reducing poverty and other social, economic, or environmental problems. YCSBS further works to disseminate knowledge on social business with academia, in the market, with government, and with civil society. Additionally, YCSBS educates students with the principles of social business and prepares them in accordance with market needs.

To achieve a more effective and better coordination of the research and development activities, Epoka established a Research and Project Office (RPO). The office will provide support for project application, administer the research calls and research funds of the university, and assist researchers in research dissemination and evaluation.

The goals and objectives of the research centers and the research and project office are as follows:

1- CES’ goals and objectives are:

- In order to cover research that investigates processes of European integration and cooperation from a political, economic, social and cultural perspective, the Center will establish new areas of research and multidisciplinary research groups.
- In order to promote scholarly work that analyzes the development of EU policies and institutions over time, the Center will increase its research output (theses, publications and policy papers).
- In order to establish inter-institutional research groups that conducts research in CES research areas, the Center will intensify its effort to apply in European wide projects.
- To increase the number of graduate studies (Master and PhD. level).
- To inform and increase awareness on the EU integration opportunities and challenges to students at all levels, by organizing joint events with leading authorities.
- To promote knowledge transfer and share best practices mainly with EU institutions.
- To develop sustainable academic partnership based on equality and mutual recognition, by building a network of institutions of common interests and developing exchange agreements or capacity building projects.

2- CoRDA’s goals and objectives are:

- To promote multidisciplinary and interdisciplinary research at Epoka University, by intensifying applications

in international projects and organizing and participating in research activities.

- To promote high quality publications.
- To increase international collaborations and intensify cooperation with regional centers.
- To increase the collaboration between academia and the public and private sector.

3- YCSBS' goals and objectives are:

- To address pressing economic, social, and environmental challenges through interdisciplinary research on the ecosystem, theory, and practice of social business.
- To improve awareness of social business through knowledge-sharing.
- To engage students in social business experiences.
- To provide consultancy and referral services to social businesses.

4- RPO's goals and objectives are:

- To promote Epoka University's national and international reputation for research excellence.
- To promote the level of engagement in research among academic staff and the quality of research outputs produced.
- To strategically build the strength and capacity of the research base.
- To build research capacity among PhD students and to motivate them to disseminate and critically apply research.
- In order to achieve high-quality research on a par with international standards, Epoka will develop a human resources strategy for research in compliance with European Research Area (ERA) priorities, and fulfill all pre-requisites for applying for "Human Resource Excellent in Research" certification.

4.3 Goals and Objectives for Student Development

Enrollment of highly qualified students is a key priority of Epoka University, whose responsibility lies with the Admission Office and the Dean of Students. The mission of the Admission Office is to admit and to serve an eligible, diverse student population nationally, regionally and internationally, while ensuring the integrity of the admission process. The Dean of Students contributes to the university's mission by facilitating access to Epoka's learning community and engaging students in an inclusive community. The mission of the Dean of Students is to provide learning experiences designed to cultivate self-awareness, wellness, care and respect for others, and prepare students for a successful life and career.

The goals and objectives for the area of student development are:

- Develop a stronger outreach program for Epoka's prospective students.
- Provide opportunities for students to increase their knowledge in extracurricular activities and internships.
- Support students in developing life and decision-making skills to optimize health, relationships, virtue, and personal finance.
- Increase the number of cultural activities in the campus.
- Create feedback and evaluation mechanisms for student's satisfaction.

- Increase the collaboration with companies to promote career and employability of students.
- Involve the alumni and increase their contribution.

4.4 Goals and objectives for training and life-long learning

Epoka will remain committed to the idea of life-long learning by offering continuing education and training courses. Epoka seeks to increase the education provision to create a trained and motivated workforce, with appropriate skills for the regional and European labor market. The involved academic units will further expand their supply in training opportunities and tailor their offerings to the needs of the labor market.

The goals and objectives are:

- Increase the number of training courses offered, whether vocational or research oriented, and in every form possible (short-term courses or summer schools)
- The offering of training and other life-long learning events shall positively affect the image and the visibility of the Epoka in the applied sciences (IT, civil engineering, design, finance and public administration).
- The Administrative Board will invest into the launching and promotion of the training opportunities with a special developed marketing strategy. The Permanent Commission on Quality Assurance will ensure the quality of provision of the training courses.

5. Management and Resources

The managing bodies at Epoka University are the Academic Senate, the Administrative Board and the Rectorate. The Rectorate will sign performance agreements with the Deans and the heads of the department, based on the obligations derived by the departmental strategies. Deans and heads of departments will report to the Rectorate, who in turn reports to the Academic Senate and the Administrative Board. The Rectorate, together with the Permanent Commission on Quality Assurance will monitor the implementation of the strategy. The Rectorate covers the issues of management, finances, human resources, infrastructure, community involvement, mobility, networking and communication.

Epoka University is committed to achieve excellence in management. The leadership of the university will continue to contribute to the achievement of Epoka's mission and vision. The organizational values and the management system will continue to ensure the sustainability of Epoka's success. The University's policies and strategies will remain focused on the interests of its stakeholders.

In alignment with the national strategies on information society, the University is committed to expand the utilization of its digital infrastructure to also include administrative processes (*e-governance*) and service provision (*e-services*).

5.1 Management System

Epoka's management system undergoes every year a review by an internal and external audit. The audit reports demonstrate that the institution's management is improving its management and increasing in efficiency, especially concerning the delivery of academic services to students. The audit will continue in providing insights for the further improvement of the management processes.

The managing bodies at Epoka University are the Academic Senate, the Administrative Board and the Rectorate. The managing authorities at Epoka University are the Rector, the University Administrator and the Deans of each Faculty. They are also responsible for the implementation of the strategy at faculty level. The management structure acts according to the law of higher education and its system is transparent.

The Administrative Board is the highest collegial administrative decision-making body, which guarantees the fulfillment of the mission, and the administrative and financial sustainability of the institution. The Administrative Board oversees and controls the University activities related to administrative, financial and economic management as well as its assets.

5.2 Financial Resources

The Rectorate formulates criteria for the allocation of human resources and submits them for approval by the Administrative Board. The Administrator proposes criteria on the management of financial and material resources, submits them for approval by the Administrative Board and supervises their allocation and implementation. The Rectorate cooperates with the Administrator on the drafting of the budget to be submitted for approval by the Administrative Board. The Administrative Board approves the annual and mid-term budget of the institution, including the investment plan, and supervises their

The Administrative Board consists of five members. The members of the Administrative Board are appointed by the Supervisory Council of the Founding Company for a period of five years and may be reappointed.

The Rectorate of the University is a collegial executive body consisting of the Rector as chairman, Vice Rectors, Deans of Faculties, Secretary General, Dean of Students, Vice-Dean of Students and the head of unit responsible for the institutional and legal matters.

In the area of management Epoka University presents these goals:

- Maintain and increase transparency in the decision-making process of the management bodies.
- Improve the communication between the different management bodies and authorities.
- Oversee the implementation of strategies at the departmental level.
- The results of evaluation will be used to further improve the efficiency of resource management at the Faculty and department level.

implementation. The Administrative Board also determines the rules for the distribution of the income generated by the University through the conduct of its activities, and supervises the use of financial resources.

Epoka University draws its funds primary from students' fees. Other funds include: international research projects and other national or international research funds.

In the area of finance, the university sets out three main goals:

- Secure appropriate funding for all teaching and research activities at the university.
- Increase external funding from international research projects and the provision of services.

5.3 Human Resources

Epoka University will continue to support its personnel, so they can release their full potential at an individual, team-based and organizational level. University's policies will continue to promote fairness and equality. Epoka's system of evaluation will continue to incentivize and motivate its staff to use their skills and knowledge for the benefit of the University. Epoka will further improve the financial compensation and the services provided to the faculty. The distribution of duties within the department, especially concerning administrative services, will undergo a revision and be subject of annual review. Epoka University will continue its commitment toward the cooperation between the industry and its academic personnel. University employees are encouraged to engage with the industry and provide services to them through the university.

In the area of human resources, Epoka University sets out these goals:

- Epoka will provide better services and better work place condition to continue attracting qualified international and national staff with extensive international experience.
- Epoka will further increase the professionalism of its human resources office. It will undertake human resources needs analysis of the

- Funding will continue to be linked to the performance of staff in terms of research.

employees, assess their job skills and performance, and plan and design an effective remuneration system. According to this strategy and the strategy of their unit, the human resources office will develop a human resources management plan, study the feasibility of flexible work schedules and provide training and development for both academic and administrative staff.

- In order to achieve high-quality research on a par with international standards, Epoka will develop a human resources strategy for research in compliance with European Research Area (ERA) priorities, and fulfil all pre-requisites for applying for "Human Resource Excellent in Research" certification under the Research and Project Office of Epoka. In order to provide a high-quality teaching and learning environment, Epoka will continue to improve its teaching and research infrastructure (e.g. labs and other facilities).
- The involvement with the industry is to be encouraged even further and departments will develop strategies on how to further attract the best professionals in the teaching career at Epoka.

5.4 Infrastructural Resources

Epoka University is committed to provide the best spatial infrastructure for its students and

staff. The management will prepare a long-term strategy for the development of facilities at

Epoka that will also integrate the urban plans of the local and central government for the region. Epoka University will increase the amount of space available for student and make a more efficient use of the available space.

The labs and other learning facilities will continue to be improved and updated in order to reach the teaching and research goals of the university. Some of the facilities will open for the community development of the district of Vora.

5.5 Quality Assurance

Epoka University has created an exemplary tradition in assuring high quality of teaching and research. This has been reflected in the positive periodical internal and external reviews of the Albanian Accreditation Agency. The Permanent Commission on Quality Assurance shall continue to conduct its internal evaluation and provide recommendations for the improvement of the quality at Epoka University. Quality assurance shall now also include other dimensions of quality, such as social policies and the community engagement of the university.

Epoka University has set the following goals concerning quality assurance:

- The further development of the internal quality assurance in teaching and research has priority over other aspects of the university.
- The Permanent Commission on Quality Assurance shall ensure an efficient and effective provision of highest quality in teaching and research.
- The Permanent Commission on Quality Assurance shall ensure the preparation of "Epoka Internal Quality Assurance

Epoka University has set the following goals concerning infrastructural resources:

- Prepare a long-term strategy for the future development of the spatial infrastructure of Epoka University in alignment with the urban plans of the local and central government.
- Create additional space to meet the demands of the increasing number of students.
- Continue to maintain the laboratories and update the existing infrastructure.

Manual" under the implementation of QAL Erasmus+ project.

- The Permanent Commission on Quality Assurance and the Rectorate shall involve all faculty members in the process and discussions concerning quality assurance.
- The Permanent Commission on Quality Assurance shall also include other aspects of quality assurance in its evaluation, such as social policies (e.g. review of the scholarship programs, the assistance to the students with special needs etc.), student's civic engagement and the service to the community.
- Epoka University commits itself to the fulfillment of the national and international standards of accreditation.
- Epoka will seek accreditation from international accreditation bodies. They should be full members of the European Association for Quality Assurance in Higher Education (ENQA) and part of a European professional association or European higher education institutions renowned in the respective disciplines.

5.6 Community and Social Involvement

Epoka University will commit more resources to the betterment of the local community in the districts of Vora, Kamza and Tirana.

Epoka will continue to produce graduates who are civically-minded, and increase their involvement in the community through their students' clubs and other associations. The university will invest its efforts and resources in transmitting not only academic knowledge and technical skills, but also knowledge for volunteer opportunities and nonprofit organizations, knowledge of contemporary social issues, listening and communication skills, diversity skills, self-efficacy and support behavioral intentions for civic behavior.

Further, Epoka remains committed to the social inclusion and gender mainstreaming policies of the national cross-cutting strategies, such as the National Strategy for the Social Protection

2015-20, and the National Strategy for Gender Equality 2016-2020.

In terms of community and social involvement Epoka University has defined these goals:

- Increase the number of projects and community involvement activities in the district of Vora and Kamza.
- Educate students for informed community involvement and motivate them to participate in the issues of their community.
- Adapt the coursework to the prerequisites of community involvement.
- The university encourages equal employment opportunity for female faculty when there is an overwhelming gender gap at the unit.

5.7 International Networking and Mobility

Epoka University has a broad network of partners and involvement in the national and international research area. The partnership with the industry has been of benefit to the students for internship and employment. The number of university partnerships in formal and informal agreements has also increased and demonstrates the reputation of the university as one of the best teaching and research institutions in Albania. Epoka will continue its commitment and the university shall utilize its alumni to broaden and deepen its cooperative network. Besides the office responsible for projects and research, the training and research centers also shall undertake an active role in networking. Faculty is required to engage in international exchange programs.

The goals for international networking and mobility are:

- Epoka University shall continue to broaden and deepen its network of partners.
- The alumni clubs and associations will be utilized to broaden the partnership network.
- Faculty involvement in international exchange will be part of performance evaluation, both at the individual and at the departmental level.
- Epoka University will continue to support student mobility with logistics and funds, especially at the graduate level.

- The research and continuing education centers are to be actively involved in the international networking of Epoka

University, in order to increase the visibility of the university and its reputation.

5.8 Institutional Communication

Epoka University stands in continuous communication with the Administrative Board, the community, the government and other stakeholders. Epoka's website and the annual reports demonstrate the will of the university to be transparent to its stakeholders. The university will continue with the activities that aim to inform prospective students across Albanian high schools. Relationships with the alumni shall also be expanded and developed further.

Epoka will continue to get involved with the community and it will intensify its support for life-long learning and continuing education by marketing these offerings appropriately. The faculty is encouraged to transmit their knowledge and engage in public debates and dialogues.

Regarding institutional communication, Epoka University has the following goals:

- As a private provider Epoka shall remain in constant communication with its main stakeholder, the Administrative Board.

- Epoka University will continue its policy of transparency and be in continuous communication with the public through its website and contact points.
- Epoka University will curate an image of a research-based teaching university that is responsive to the needs of Albanian society and the development of the labor market.
- The university will develop a communication and marketing strategy to increase visibility and improve on its reputation.
- The university will increase communication activities that aim to inform prospective students and recruit highly qualified teachers.
- The university will improve its inner communication among its management, administration, students and faculty.
- In alignment with the national Cross-Cutting Strategy of Information Society, the University will expand its digital infrastructure to all other areas of management.

6. Implementation

Epoka University has prepared an action plan and a performance contract with the departments and other units for the implementation of this Framework Strategy. The Academic Senate will be informed annually about the implementation of the strategy. The Rectorate shall initiate the first evaluation after the first two years and submit it to the

Academic Senate and the Administrative Board, in that order. Within 2020 the departments and other responsible units of the university shall prepare and submit their first evaluation reports and studies that define the changes and opportunities for the further implementation of the strategy. The Administrative Board is committed to provide the financial resources

for the successful implementation of the strategy.

The measurable outcomes in the table below may correspond to more than one objective or goal.

Action Plan and Indicators

Area	Goals	Objectives	Instruments and actions	Measurable outcomes	Start	End
A. Teaching & Learning	G.1 Improve quality of study programs by launching innovative and multi-disciplinary study programs	O.1 Increase the number of study programs	I.1 Increase the number of Bachelor programs	M1. Design two for FAE, one for FEAS in two years, and two for FLSS in three years	2019	2022
			I.2 Increase the number of Master of Science/Professional Master programs	M.2 Develop one Master of Science and one Professional Master for FAE, one Master of Science for FEAS, and one Master of Science for FLSS	2019	2022
	G.2 Tailor programs to labor market demand	O.2 Offer practice relevant knowledge in undergraduate programs	I.3 Revise curriculum to adapt to labor market demands	M.3 Revise all curricula	2020	2022
		O.3 Offer practice relevant knowledge of Master of Science and Professional Master programs	I.3 Revise curriculum to adapt to labor market demands	M.3 Revise all programs	2020	2022
	G. 3 Improve the curriculum	O.4 Promote creativity, innovation, entrepreneurship and critical thinking	I.4 Revise curriculum to integrate critical thinking skills and entrepreneurship	M.3 Revise all programs	2020	2022
		O.5 Align curricula with UNESCO's goals of sustainable development	I.5 Revise curriculum to align with UNESCO's goals.	M.3 Revise all programs	2020	2021
	G.4 Improve methodology of	O.6 Encourage faculty to develop innovative	I.6 Train faculty for course design according to the	M.4 Annual training and workshops for teaching and	2018	2022

teaching	and creative approaches to teaching	Bologna System	course design		
		I.7 Incentivize staff to critically assess their teaching philosophy and methodology	M.4 Annual training and workshops for teaching and course design	2018	2022
G.5 Expand the international dimension of teaching & learning	O.7 Emphasize international aspects or content in the curriculum	I.8 Revise curriculum to emphasize international aspects and content	M.3 Revise all programs	2018	2019
	O.8 Encourage staff exchange and mobility	I.9 Recruit and assess staff performance based on their mobility	M.5 Increase the annual number of exchanges by 20%	2018	2022
			M.6 One course taught abroad by Epoka's staff each year	2018	2022
			M.7 Adapt regulation of staff evaluation to include in the assessment criteria	2018	2019
		I.10 Encourage staff mobility financially by giving stipends and premiums for staff teaching courses abroad	M.8 Earmark an amount in the budget as financial contribution for staff mobility	2018	2022
	O.9 Increase the number of international students	I.11 Facilitate and encourage the enrollment of foreign students	M.9 Draft Epoka's social media strategy for international markets	2018	2019
		I.12 Organize social media international campaigns and advertisement	M.9 Draft Epoka's social media strategy for international markets	2018	2019
	O.10 Meet the quality assurance standards of international accreditation agencies	I.13 Study the possibility of international accreditation of Epoka	M.10 Draft a policy paper on the international accreditation procedures and opportunities	2018	2019

		I.14 Develop a plan for the international accreditation process	M.11 Develop a strategic plan for the international accreditation	2019	2020
		I.15 Review and adapt international teaching and management standards for international accreditation bodies	M.10& M. 11	2019	2022
	O.11 Expand Epoka's network of HEI partners	I.16 Encourage staff to create opportunities for cooperation between Epoka and Western universities	M.7 Adapt regulation of staff evaluation to include in the assessment criteria	2018	2019
			M.12 The number of partnership agreements should increase by 30%	2019	2022
G.6 Increase student performance	O.12 Increase retention rates	I.17 Study and diagnose issues with student enrollments, applications and achievement	M.13 Prepare a report on the effect of tuition fees and the quality of application, enrollment and retention	2018	2019
			M.14 Prepare an action plan to increase retention	2019	2019
		I.18 Study and diagnose issues with students' achievement (grades, projects and performance)	M.15 Prepare a report on student performance at Epoka University for each year	2019	2022
	O.13 Increase student satisfaction with the study programs	I.19 Improve feedback mechanisms from students in Master of Science/Professional Master and PhD programs	M.16 Change the teacher's evaluation format	2019	2019
			M. 17 Receive feedback from student representatives on the curriculum	2018	2022

				M.18 Improve students' participation in the representative bodies	2018	2022
			I.20 Increase student involvement in ancillary activities	M.19 Increase the number of students engaged in internships	2018	2022
				M.20 Increase the number of students' clubs and their membership	2018	2022
				M.21 Increase the number of cultural activities at Epoka	2018	2022
	O.14 Assess student learning outcomes		I.21 Improve the learning outcomes of the programs: align curriculum activities with the learning outcomes	M.22.a Prepare report on the alignment of the curriculum activities with the mission of the university and the learning outcomes	2019	2020
				M.3Revise all curricula	2020	2022
			I.22 Improve the assessment of knowledge, skills and competences of students	M.22.b Prepare report on the alignment of the general education curriculum activities with the learning outcomes (communication, research, reasoning, civic engagement, intercultural skills, application and integration of learning)	2020	2021
				M.23 Prepare report on the alignment of the curriculum activities with the learning outcomes	2020	2021
B. Research and Project	G.7 Increase the quality and quantity of researchand project development	O.15 Increase the Research and Project budget of Epoka	I.23 Provide financial support for faculty engaging in research and project development	M.24 By 2022 the research budget at Epoka will constitute 20% of the total budget	2018	2022

			M.25 Increase the number of faculty gaining financial support for research and projects	2019	2022
	O.16 Increase the reputation of Epoka in research and projects	I.24 Differentiated financial support for research activities that increase the reputation of Epoka University, respectively for research papers, conference papers and other relevant events	M.26 Continue to give full financial support to faculty who participate in conferences and publish their proceedings in Web of Science and Scopus indexed journals	2018	2022
	O.17 Increase the international reputation of Epoka in research	I.25 Develop human resources excellence strategy in compliance with European Research Area (ERA) priorities	M.27 The amount of research papers published in Web of Science and Scopus indexed journals should increase by 10% each year	2018	2022
			M. 28 Application for "Human Resource Excellence in Research" certification in 2021	2021	2021
		I.26 Departments will increase the number of international conferences organized at Epoka University	M.29 Organization of international conferences at Epoka	2018	2022
	O.18 Increase the internationalization of research and project activities	I.27 Departments shall increase the number of project application and the quantity of collaboration with foreign researchers	M.30 The number of research project application will increase annually	2018	2022
		I.28 Epoka will increase the number of partnerships for international projects such as Erasmus+ and Horizon 2020	M.31 The number of collaboration between domestic and foreign researchers will increase annually	2018	2022

			M.32 The number of research project partnership will increase annually	2018	2022
	O.19 Research activities will have strong interdisciplinary elements	I.29 Conference organizers are required to involve and increase the participation of the scholars across disciplines	M.29.a Annual organization of international conferences at Epoka	2018	2022
			M.29.b Faculties shall create interdisciplinary brainstorming events among Epoka staff to design innovative interdisciplinary research projects and then publish the results in journals	2018	2022
	O.20 Research should be oriented towards the needs of Albanian society and regional concerns	I.30 Research activities financed by Epoka will be oriented towards the needs of the Albanian society and the regional concerns	M.25 Increase the number of faculty gaining financial support for research	2019	2022
G.8 Intensify the engagement of the research centers and emphasize their research profile	O.21. CES' and CoRDA's goals and objectives to be in alignment with the overall goals of research and project development at Epoka University	I.31.1 CES's objectives are to promote research in the development of EU policies	M. 31 Increase collaboration with international and national researchers in the field of EU integration	2019	2022
		I.31.2 CoRDA's objectives are to promote multidisciplinary and interdisciplinary research	M. 31 Increase multidisciplinary and interdisciplinary research projects	2019	2022
		I.31.3 CoRDA's objectives are to increase the cooperation with the	M. 31.a - Increase the cooperation with the industry, public and private	2019	2022

			industry	sector		
C. Community service	G.9.1 Epoka University will offer services in those areas that the university has demonstrated expert knowledge	O.22.1 Encourage graduate students and professionals at Epoka University to offer consultancy and expertise to the public and private sector	I.32.1Epoka encourages its staff to offer services to the public or private sector in the fields of engineering, design, business, finance and social sciences	M.33 Draft an assessment report on the third mission activities at Epoka	2019	2022
				M.7 Adapt regulation of staff evaluation to include third mission activities in the assessment criteria	2019	2022
				M.34 Annual increase of the number of projects and services provided by Epoka academic and administrative staff	2019	2022
				M.35 Annual increase of the number of personnel engaged in service provision	2019	2022
		O.22.2 Services will be provided in the framework of research and teaching activities	I.32.2 Faculties engaged in service provision activities adapt their courses accordingly and involve graduate students in their projects	M.35Annual increase of the number of personnel engaged in service provision	2019	2022
	G.9.2 Students at Epoka are civically engaged and aware of the problems of their community	O.23 Graduates demonstrate an increased capacity for civic responsibility	I.33 Change curriculum to include activities relevant to service learning	M. 3Review all curriculum	2018	2022

D. Training & Lifelong learning	G.10 Life-long learning units expand the supply in training opportunities	O.24 The training centers offer training in high-demand vocational fields	I.34 Assess the actual and future opportunities of Epoka being involved in vocational education projects	M.36 Draft a report on the possibilities of Epoka being involved in vocational education EU and GIZ projects	2019	2020
				M.37 Annual increase of training Certificated seminars provided at Epoka University	2019	2022
	G.11 Increase the visibility of the University	O.25 Develop a marketing strategy for the training courses	I.35 Marketing strategy for the training courses	M.38 Draft a marketing strategy	2018	2019
				M.38-b The marketing strategy should contain a strategy for the provision of training courses	2018	2019
	G.12 Ensure the quality of the training courses	O.26 Assess and increase the quality of training courses	I.36 The Permanent Commission on Quality Assurance will assess the design and implementation of courses	M.39 Bi-annual assessment of the certificated seminars	2020	2022
E. Student Development	G. 13 Increase the quality of student outreach and development programs	O.27.a Develop a stronger outreach and recruitment program	I.37 Improve the current outreach program	M.39.a Asses the current program and prepare recommendations	2019	2022
			O. 27.b Increase the quality of student life	M.39.b Increase the number of events and student clubs by 10%	2019	2022
			I.38.b Improve student's satisfaction feedback and evaluation system	M. 39.c Prepare and issue the new student's satisfaction survey	2019	2019
			I.38.c Involve the alumni and increase their contribution to student development programs	M. 39.d Invite alumni to participate in students' events	2018	2022

F. Management & Resources						
F.1 Management	G.14.1 Maintain and increase transparency in the decision-making process of the management bodies	O.28.a Optimize participation, transparency and accountability of Epoka's governance system	I.39.a Review and revise the regulatory framework of Epoka	M.40.a Report assessing the regulatory framework of Epoka	2019	2020
				M.40.b The number of revised regulations	2020	2022
	G.14.2 Improve communication across the university	O.28.b There is an appropriate delegation of the authority within and outside Epoka	I.39.b Review and assess the delegation of authority at Epoka	M.40 The number of revised regulations	2020	2022
		O.29 Decisions at Epoka University are rational, informed and transparent	I.40 Ensure that decisions at Epoka follow the Statute	M.41 Qualitative Report assessing the decision-making process at Epoka (staff interviews and process-tracing)	2020	2020
	G.15 - Oversee the implementation of the strategies at the departmental level	O.30 The management oversees the implementation of the strategy	I.41 Deans and heads of the departments oversee the implementation of the strategy	M.42 Annual evaluation reports of the strategy	2018	2022
	G.16 Improve the efficiency of resource management at the Faculty and department level	O.31 Use the evaluation and audit reports to improve efficiency	I.42 Evaluation reports findings are discussed in meetings and reflected in the plans for improvements	M.43 Recommendations and changes refer to the findings of the audit and other assessments	2018	2022
F.2 Finance	G.17 Secure appropriate funding for all teaching and research activities	O.32 Research and teaching activities at Epoka are appropriately funded	I.43 Epoka has a long and short-term financial plan	M.44 Draft the long and short-term financial plan	2019	2019
