

EPOKA UNIVERSITY
DEPARTMENT OF
ARCHITECTURE
TIRANA – ALBANIA

Dear Supervisor,

EPOKA University Faculty of Architecture and Engineering, Department of Architecture is greatly concerned with the synthesis of practical training with theoretical studies. An outcome of this concern is the compulsory Summer Practice courses for the fifth-year students in the Integrated Second Cycle Study Program of the Department. The student must fulfill the requirements of these courses to graduate with a Master of Science Degree.

The ARCH 310 – Summer Practice at Construction Site is conducted at the end of the fourth year, and it aims to introduce students of architecture to the context in a construction site by allowing them to observe and participate in project development, relations of projects and implementation and various construction procedures. The duration of summer practice is 36 workdays, and it is very important for the students to monitor different work processes during the internship.

We kindly request you to submit the *evaluation form* to the student in a sealed and signed envelope after the work period to complete the grading process.

I thank you in advance on behalf of our students for your valuable contributions to the educational program of our school.

Best regards,

Prof. Dr. Sokol Dervishi
MSc. Nerina Baçi
